A clear overview of approval coordination for commercial, retail, office, restaurant, healthcare and other fitout projects in Dubai.

1. About Fitout Approvals

Fitout Approvals is a licensed engineering consultancy operating under Project Management Services LLC. The company supports businesses, contractors, designers and property stakeholders with the planning, documentation, submission and follow-up involved in fitout approval processes in Dubai. The aim is to make approval coordination more organized, reduce avoidable resubmissions and help projects move forward efficiently.

2. Fitout Approval Services

Service	What It Covers
Authority Approvals	Identifying and coordinating the approvals applicable to a fitout project.
Approvals Dubai	General support for navigating Dubai authority and stakeholder approval requirements.
Dubai Municipality Approvals	Documentation and submission coordination for projects requiring Dubai Municipality involvement.
Dubai Development Authority (DDA) Approvals	Approval coordination for projects located within areas under the relevant DDA requirements.
Civil Defense Approvals	Coordination of applicable fire and life-safety approval requirements.
DEWA Coordination	Coordination related to applicable utility and project documentation requirements.
NOC Approvals & Coordination	Support with required NOCs and coordination among relevant parties.
Building Management & Landlord Approvals	Coordination with property management and landlord requirements before or during submission.
Fitout Permit Services	Support with the applicable fitout permit process and required documentation.
Technical Drawings & Documentation	Preparation, review and coordination of drawings and supporting documents.
Authority Submission & Follow-up	Submission coordination, status tracking, comments and revision follow-up.
Inspection Coordination	Planning and coordination for inspections required by the relevant authority or project.
Final Approval Coordination	Follow-up on final approval and close-out requirements.
Fitout Project Management	Structured coordination of approval-related activities throughout the fitout process.

3. Projects We Support

Approval requirements vary according to the property, location, business activity, building rules and proposed works. Fitout Approvals can support projects such as commercial offices, retail units, restaurants and cafés, pharmacies, business centres, healthcare facilities and other commercial interiors.

4. Why Approval Coordination Matters

Dubai fitout projects may involve several authorities and stakeholders, each with its own documentation, drawing standards, submission procedures and inspection requirements. A well-organized process helps identify requirements early, coordinate documents correctly and manage comments or revisions without unnecessary delays.

5. Typical Fitout Approval Process

- 1. Project assessment:** Understand the property, activity, scope of work and applicable requirements.
- 2. Authority identification:** Determine which authorities and stakeholders need to be involved.
- 3. Documentation:** Prepare and review drawings, forms and supporting documents.
- 4. NOCs and stakeholder coordination:** Complete applicable landlord, building management and other prerequisites.
- 5. Submission:** Submit through the relevant authority or platform.
- 6. Follow-up:** Track comments, revisions and approval status.
- 7. Inspection:** Coordinate inspections when required.
- 8. Finalization:** Follow through on final approval and close-out requirements.

6. Dubai Development Authority (DDA) Approvals

Dubai Development Authority (DDA) approvals can be relevant to fitout projects located in areas or developments governed by DDA requirements. The exact process depends on the property, project scope, building and applicable regulations. Fitout Approvals provides coordination support for documentation, submission and follow-up so that the project team has a clearer approval path.

7. Approvals Dubai: What Businesses Should Prepare

When planning a fitout in Dubai, businesses should first confirm the property requirements, permitted activity and applicable authority procedures. The project may also require landlord or building management clearance, technical drawings, NOCs, authority submissions and inspections. Preparing these requirements in the correct sequence can help reduce avoidable comments and delays.

8. Frequently Asked Questions

What are fitout approvals in Dubai?

They are the permits, NOCs, authority clearances and stakeholder approvals applicable to interior fitout works.

Do all projects require the same approvals?

No. Requirements depend on the property, location, activity, building and scope of work.

What is Dubai Development Authority approval?

It refers to the approval process applicable to projects falling under relevant DDA requirements.

Can multiple approvals be coordinated together?

Applicable authority and stakeholder activities can be planned and coordinated as part of one structured approval workflow.
